Personal Profile

In the past few years, I have been coding as a hobby while travelling. In 2019, I started coding on a daily basis, refreshing my knowledge and improving my skills.

I am looking for a job opportunity in the IT industry that will allow me to test myself, confront with other skilled professionals and learn from them and the company.

I am truly passionate about coding and as a worker, I am motivated and precise. I got to learn the basic knowledge at my Senior school. Since then, I have continued to improve and update my abilities on my own.
